Madio	200
Niek	204
Jort	202
Tijmen	205
Project total	1022

Date	Activity	Time spent	Total	211
14-11-2017	Initial commit	5		
14-11-2017	Lecture	2		
16-11-2017	tijdelijke .txt bestanden voor indeling van deliverables	2		
18-11-17	Researching backend frameworks	7		
19-11-17	Researching frontend frameworks	5		
22-11-2017	Lecture	2		
23-11-17	Project Document writing	2		
25-11-2017	Check if build test builds successful, Check if test fails the build, Added .env flags, Initial files for the AdonisJS application, Merge pull request #2 from vincevannoort	6		
26-11-2017	Add sketch file, Update Models and add dummy Routes, Merge pull request #5 from vincevannoort/modelsImplemented Models, Seeds and Factory, Implement fa	7		
27-11-2017	Update migration and factory with insights for a company, Add dummy controllers	2		
28-11-17	Project Document writing	3		
28-11-2017	Move cross-env, laravel-mix & webpack to normal dependencies from devdependencies, Merge pull request #9 from vincevannoort/integrate-vueAdded laravel-mix	6		
29-11-2017	Basic SPA in Vue with Vue router, Make it easier to start the dev server and compiler at the same time, Disable success notifications, Easier factories and seeding	5		
29-11-2017	Lecture	2		
30-11-2017	Finished login view, Disable auth for now, to make development for the other easier, Created the main layout of the applicatoin, Further implemented SPA	6		
1-12-2017	Add new route for single companies, Get profile from authentication token	6		
2-12-2017	Add keep alive to inner view, Merge pull request #12 from vincevannoort/single-page-applicationCreated layout, relations and relation views with data, Created part	2.5		
4-12-2017	Update filenames	2.5		
5-12-2017	Close database after seeding finished	2		
6-12-2017	Remove linebreaks, Added migration and linebreaks, Application flow and links to documenation of used software, General folder structure with explanation, Install	3		
6-12-2017	Lecture	2		
13-12-2017	Add momentjs for easier dates, Write commments for company controller, Remove unused svg files for clarity, Remove type as an entity, Move views in seperate fr	2		
13-12-2017	Lecture	2		
14-12-2017	Linked company to contactcontroller, Add conditional rendering based on contacts available, Implement store function from company controller, Change directory n	4		
15-12-2017	Update comments in contact controller	2.5		
16-12-2017	Started working on promotion website, Get profile data from authenticated user, Re-enable authentication and make file for promotion website, Rewrote index meth	6		
17-12-2017	Make use of export default, Implemented edit functionality for companies, Move contact functionality to contact controller	2		
18-12-2017	Change comments and remove ;, Reworked back link, convert store -> update, Consistency Company -> Relation and Companies -> Relations, Make the id more c	7		
19-12-2017	Make it more clear what data is being passed, Change design of promotion page, Change asserts so that deployment is possible, Throw errors when functions fail,	9		
20-12-2017	Written another specification for relations, Started working on proposal create view, Added social media component, Fix bug when going from edit to create view	4		
21-12-2017	Skip tests that are not done yet, but written what they do	3		
23-12-2017	Implemented filtering for relations overview, Added some information to proposals box, Added 2 more tests	3		
24-12-2017	Updated proposals box on relation single view, Update documentation for (maybe) using a documentation generator	2		
27-12-2017	Update social media, Update height, Updated chart for relation overview	2		
28-12-2017	Yarn.lock shouldnt be ignored, Merge pull request #43 from vincevannoort/browser-testslmplemented browser tests, Further implement browser tests, Added real t	6		
29-12-2017	Update insight calculation	4		
30-12-2017	Make all filters work, Added value, start and close to proposals, Update browsersync, Install node schedule, Update insight after store, delete, update, Update insig	11		
31-12-2017	Add boxes to contact view, Add value_total to relations and value to a proposal	2.3		
1-1-2018	Integrated eslint and updated all to to match rules & stylingIntegrated eslint and updated all to to match rules & styling, Integrate elsint in webpack so the team can	5		
2-1-2018	Update relations after seeding so value is correct<option-return>, Update a insight & value when the relation is updated<option-return>, Add meta titles<option-retu	2		
4-1-2018	No authentication on the login view, Add euro sings :moneybag:, Add some relation information, Allow creating of proposals, Allow scripts to run concurrently	3		
5-1-2018	Merge branch 'develop' of https://github.com/vincevannoort/informatica-introductieproject into develop, Move create functionality inside modal (#45)* Floor value of	2		
8-1-2018	Remove transition groups, Add up transition, Accidentally removed opacity, Added transition for models and views, Pass contacts and relation to return of proposal	3		
9-1-2018	Show users on user view (#47), Change color, Update color and logo's, Adjust background	4		
10-1-2018	Fix search filter, Allow to show history with 'yarn history' or 'npm run history', Easier getting of the contactproposals and make it look nicer, Relation from roles to (re	3		
11-1-2018	Random amount of roles, Add remaining factories, Create influences, Create contact influences, Update factories, Merge branch 'develop' of https://github.com/vinc	4		
12-1-2018	Typo, Proposal changes, Load many	3		
13-1-2018	Add strengths and weaknesses to relation, Change layout of strengths and weaknesses, Make contact view more inline with #26	5		
14-1-2018	Changes to address adonisjs warning, Store note, Merge branch 'develop' of https://github.com/vincevannoort/informatica-introductieproject into develop, Refactore	6		

15-1-2018	Pass validation errors to parentsee http://vee-validate.logaretm.com/advanced#injection , Update grading to give a better score, Also for a relation, Set standard ins	6			
16-1-2018	Merge branch 'develop' of https://github.com/vincevannoort/informatica-introductieproject into develop, Add overview of proposals, Return 0 if there are no gradings	6			
22-1-2018	provide	8			
23-1-2018	provide	9			

Date	Activity	Time spent		Total	200
14-11-2017	Lecture, Brainstorming for Project ideas	4			
16-11-2017	Brainstorming for Project ideas	2			
19-11-2017	Discussing our project ideas, deciding our project idea	4			
20-11-2017	Learning HTML5	5			
22-11-2017	Lecture	2			
22-11-2017	Meeting with tutor to discuss our project and later also with group	3			
23-11-2017	Starting the ProjectDocument, discussing the project	5			
26-11-2017	Learning Vuejs	2			
27-11-2017	Learning CSS3	5			
28-11-2017	Meeting with group to discuss the project and make the Project Document	2			
29-11-2017	Lecture, learning AdonisJs	5			
30-11-2017	Setting up AdonisJs	2			
3-12-2017	Creating formula/ algoritmes	5			
4-12-2017	Implementing views	3			
5-12-2017	Finilasing Project Document, working on formula/ algoritme	3			
6-12-2017	lecture, learning javascript	3			
7-12-2017	Learning AdonisJs	5			
8-12-2017	learning /Implementing controllers	3			
9-12-2017	Learning AdonisJs	4			
10-12-2017	Learning HTML5	2			
11-12-2017	Learning AdonisJs, learning/ implementing vieuws	3			
12-12-2017	Learning adonisjs & Vuejs	2			
13-12-2017	lecture, working on formula/ algoritme/ theorie	4			
15-12-2017	Implementing views	5			
16-12-2017	Learning Vuejs, implementing controlllers	3			
17-12-2017	Learning AdonisJs, typescript	5			
18-12-2017	Making presentation	2			
19-12-2017	Implementing formula, views	3			
21-12-2017	Implementing seeders	1			
22-12-2017	Learning Javascript	5			
23-12-2017	Learning CSS3, implementing models	3			
27-12-2017	Implementing controllers	2			

28-12-2017	Learning AdonisJs	2			
28-12-2017	Implementing seeders	2			
29-12-2017	Learning Javascript	3			
29-12-2017	Implementing controllers	2			
30-12-2017	Learning HTML5	2			
30-12-2017	Implementing models	3			
2-1-2018	Implementing components	3			
3-1-2018	Learning Vuejs	1			
3-1-2018	Implementing views, dashboard	6			
4-1-2018	Implementing formula & seeders	5			
5-1-2018	working on formula	3			
6-1-2018	Implementing controllers	4			
7-1-2018	Implementing views	2			
8-1-2018	Learning Javascript, implementing views	4			
9-1-2018	vergaderen, eindverslag, display dashboard	4			
9-1-2018	Learning Typescript	3			
9-1-2018	Implementing tcontrollers, learn typescript	5			
10-1-2018	Creating formula	2			
11-1-2018	dasboard, learn vuejs	2			
12-1-2018	Learning Typescript	3			
13-1-2018	Learning Javascript	1			
14-1-2018	learn html/adonisjs	3			
15-1-2018	formules proposals, algoritm competition, dasboard	7			
16-1-2018	components, controller	4			
21-1-2018	Help information for user	2			
22-1-2018	presentation, final report, help information for user	7			
23-1-2018	Finalreport, finish touchup, presentation	8			

Date	Activity	Time spent		Total	204
